thin client
EX-5400/5450

High Performance, Multi I/O

Overview

EX-5400/5450 offer unparalleled superior performance compared to any other thin client in the market may it be a CE.NET, Linux or XPe thin client. EX-5400/5450 are high-performance Windows CE.NET-based thin clients that are perfect for users in LAN/WAN environments, which need a whole array of Office applications, packages of terminal emulations to connect to Legacy servers and a collection of value-added software modules of Xtreme Plug-Ins (XPIs). EX-5400/5450 support concurrent multi-sessions, strong 3D graphics, high display resolutions, modular plug-ins software, and audio. The EX-5400 is a Legacy-Free thin client with 3 USB ports, while EX-5450 owns both USB & Legacy Ports (Serial/Parallel).
